Multi Bootwiper BWP-003

Once you have unpacked your Boot Wiper main frame, find a suitable place to insert your product. Mark out the centre points of your frame, then create a hole 450mm down and concrete into place

Replacing Brushes (BWP-021):

When you have unpacked your replacement brushes, Place the large (610x73x25mm) brush into the channel, using BOL781 screw brushes into place.

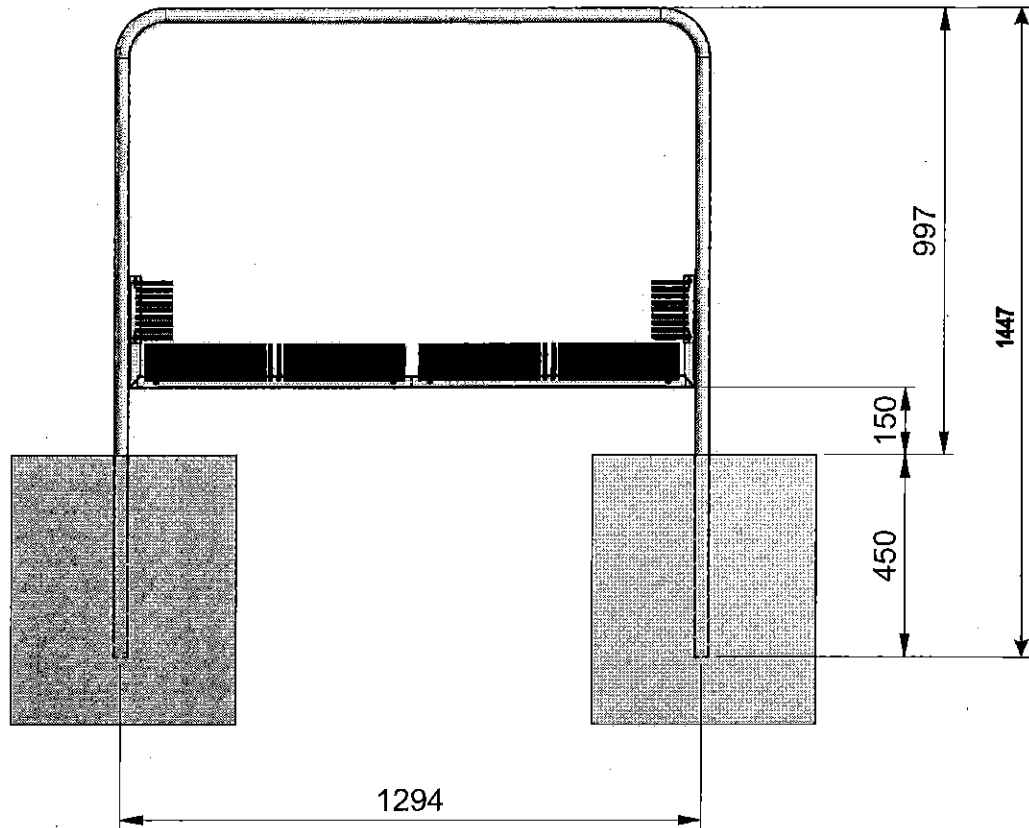

Place the small (152x73x25mm) brush into the vertical channel and screw into place with BOL781

MAKE SURE ALL SCREWS ARE FULLY TIGHTENED BEFORE USE

GENERAL MAINTENANCE:

Periodically hose or wash down to get rid of any excess soil. Check screws for tightness and touch up any chips and scratches with paint to stop rust and bubbling of paint. Replace brushes when necessary to keep you boot wiper in full working order.

MULTI BOOTWIPER BWP-004

Once you have unpacked your Boot Wiper main frame, find a suitable place to insert your product. Mark out the centre points of your frame, then create a hole 450mm down and concrete into place
