IMPORTANT PLEASE READ THE ASSEMBLY INSTRUCTIONS CAREFULLY BEFORE STARTING TO ASSEMBLE YOUR BADMINTON POSTS

Assembly Instructions

1 Place the posts directly on the doubles side lines. Attach one end of the net headline cord to the 'Net Fixing Cleat' on one post and then take the other end over the pulley wheel on the other post and attach this loosely into the cleat. At this stage loosely tie the bottom of the net around the post so it keeps its shape.

2 Wind the adjustable foot up or down until the net headline is set at 1.55m then lock off the foot with the lock nut.

3 Tension the net to the correct height by pulling it through the cleat and securing on the 'teeth' of the cleat. Doing this one end will automatically tighten the other end of the net into the cleat.

NOTE: The correct height for the net is as follows: 1.55m at each end of the net and 1.524m at the centre of the net.

4 Once the net is tensioned use the velcro net ties to hold the net tight against the post. Use one tie every other mesh. Re-tie the bottom of the net so that this is tight. Once the posts are set up they should look like the example shown in Fig. 1.

Note: Fit the base covers over the weighted bases, with the foam on top, and fasten in place with the velcro straps.
