View of Product**Assembly Instructions**

- 1** Using the part list overleaf, identify the parts ready to assemble.
- 2** Slide the collar on the ring bracket over an appropriate post and secure through the post using the M10 x 75mm Hex bolt, a 10mm spring washer and the M10 wingnut, parts 2, 3 and 4, as shown in the diagram overleaf.
- 3** Pull the net into shape and attach it to the ring by lacing the twine included over the ring and through the meshes. Tie off each end of the twine onto the ring either side of the support bar.
- 4** Repeat process for second ring.
- 5** Check the fastenings periodically to ensure that they have not vibrated loose. Tighten as required.
